

SIMPLICITY SELLS.

Introducing the AP1
A 2-in-1 device that combines video and telematics into one unit — priced to compete.

ADAS TECHNOLOGY WITH DRIVER ALERTS

Lane Departure Warning

Forward Collision Warning

Headway Monitoring Warning (Tailgating)

KEY FEATURES AND BENEFITS

- 2-in-1 device works with your existing telematics black box or as a replacement
- Reduces footprint of video telematics deployments
- Most critical Advanced Driver Assistance Systems (ADAS) feature set for safety improvement
- Plug-and-play design for lightning-fast, cost-effective installation
- Fail-safe (last-gasp) functionality to ensure video is uploaded to the cloud during a catastrophic event
- Assisted-GPS technology automatically uses cellular towers to triangulate the location in the absence of line of sight with a satellite
