

TRUE FLEXIBILITY IN VIDEO TELEMATICS.

Introducing the KP2
Install road-facing.
Add driver-facing.
Now, or later.
You're in control.

KEY FEATURES AND BENEFITS

- 2-in-1 video/telematics device with Advanced Driver Assistance Systems (ADAS) features and innovative modular design
- Road-facing HD video camera records and uploads event data to the cloud
- ADAS provides real-time natural language safety alerts to your drivers
- Snap-on driver-facing camera provides instant access to AI-powered driver distraction and fatigue detection features
- Plug-and-play design enables lightning-fast self-installation
- Failsafe technology ensures video uploaded during catastrophic event, even in absence of satellite line of sight
- Comes FirstNet certified, enabling qualified users to access AT&T's exclusive emergency cellular network
- 12 months GPS data retention standard; with SmartPay, standard 9-month event/video data retention extended to 12 months
- 64GB microSD card that can store over 50 hours of footage before beginning to overwrite
- Geofencing allows automatic switch-off at borders enabling compliance with local GDPR laws
- Trailer/load surveillance and security
- Optional panic button available
