

How to Use the SmartOPS Provisioning Wizard

The Provisioning Wizard, powered by SmartOPS, is the software tool used to activate, assign and prepare your new devices for activation on the Sensata INSIGHTS platform.

This self-service tool provides you the control to assign your INSIGHTS devices to your organization's SmartAPI Tenants and activate each device's SIM card (when applicable).

Use of the Provisioning Wizard lends every Partner the freedom to associate any device with their preferred Tenant without contacting Support.

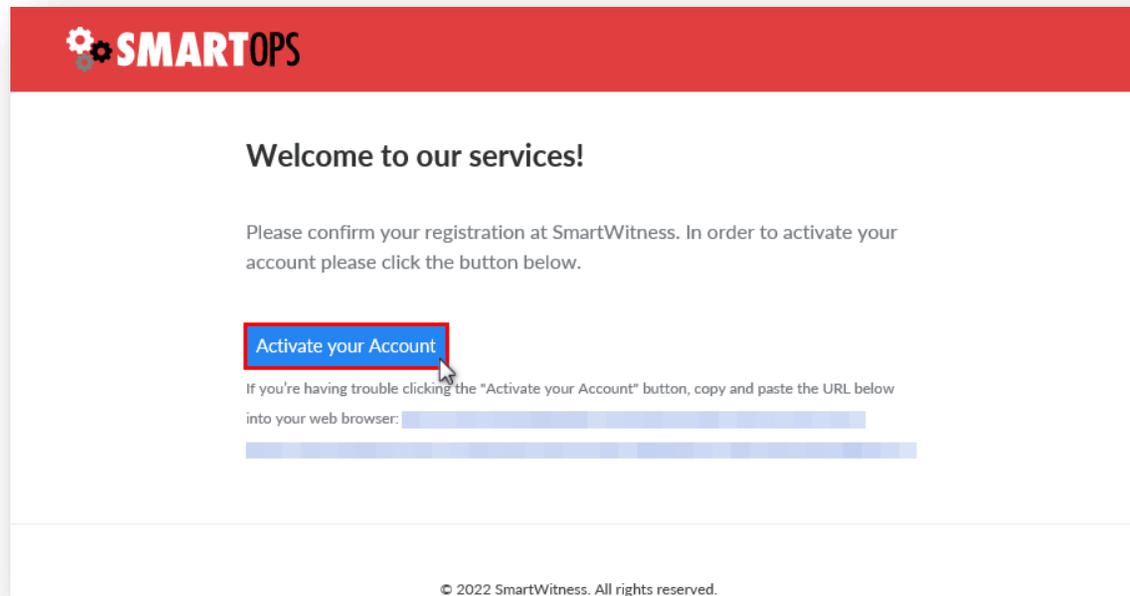

A Few Reminders:

- Once you have completed the provisioning process, you will receive an email with the results within one business day.
- Once provisioned, devices with built-in SIM cards change to "Activation Ready" status. Monthly charges for data usage will not occur until the SIM begins transmitting data through the cellular network; SIM status changes from "Activation Ready" to "Activated."
- You may activate your AT&T SIM cards from INSIGHTS with Sequence and CSV provisioning methods. Closely monitor monthly data usage charges and activate devices on your own accord.
- SmartAPI Tenant availability is permission-based, so access to different Tenants may vary. If you have questions regarding the listed Tenants, contact [support](#).

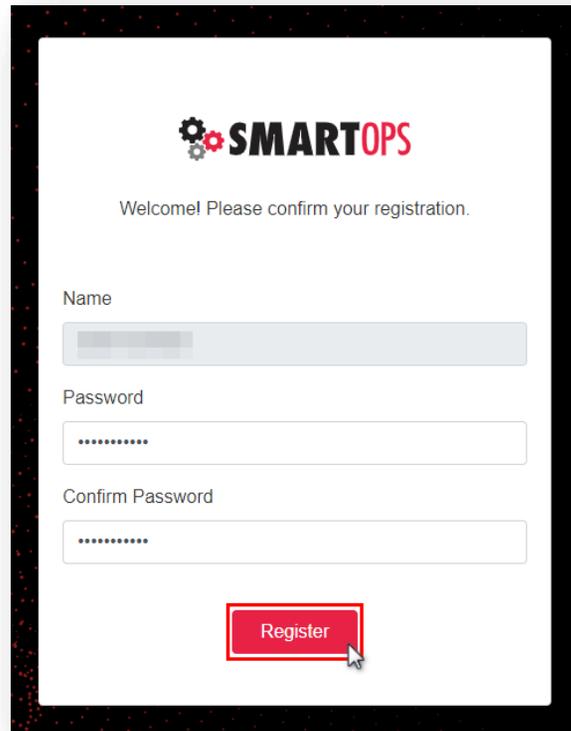

Gain Access to SmartOPS

To obtain authorized access to the Provisioning Wizard, contact the [Support Team](#). Our support experts will create an account and send you an invitation token to finalize your SmartOPS setup.

After receiving the invitation email, click **Activate Your Account** to set up a password and complete your SmartOPS onboarding.

SmartOPS will prompt you to create a password. Use a password that is *at least* eight characters long with a combination of uppercase and lowercase letters, symbols and numbers.

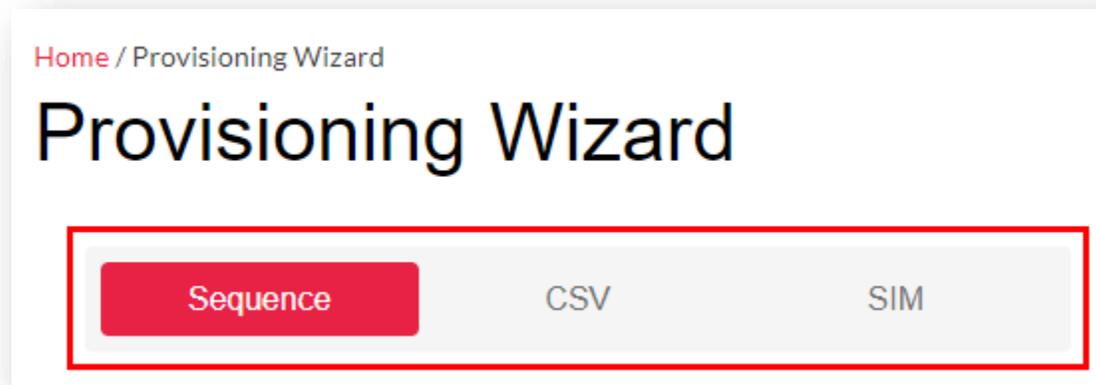

A registration form for SmartOps. At the top is the SmartOps logo, which consists of three interlocking gears (two black, one red) followed by the text "SMARTOPS" in a bold, sans-serif font. Below the logo is the text "Welcome! Please confirm your registration." The form contains three input fields: "Name" (a light gray field), "Password" (a white field with a masked password "*****"), and "Confirm Password" (a white field with a masked password "*****"). At the bottom of the form is a red "Register" button with a white mouse cursor pointing at it. The entire form is enclosed in a black border with a decorative pattern of small red and white dots.

After you enter your password, click **Register** to finalize your account details. You will land on the SmartOPS home page. To navigate to device provisioning, click **Provisioning Wizard** in the left navigation bar.

Activate Your Devices

You will see 3 options to activate your devices on SmartAPI:

1. [Sequence](#) – For provisioning a range of devices without a CSV file
2. [CSV](#) – For provisioning multiple devices
3. [SIM](#) – For provisioning a single device's SIM

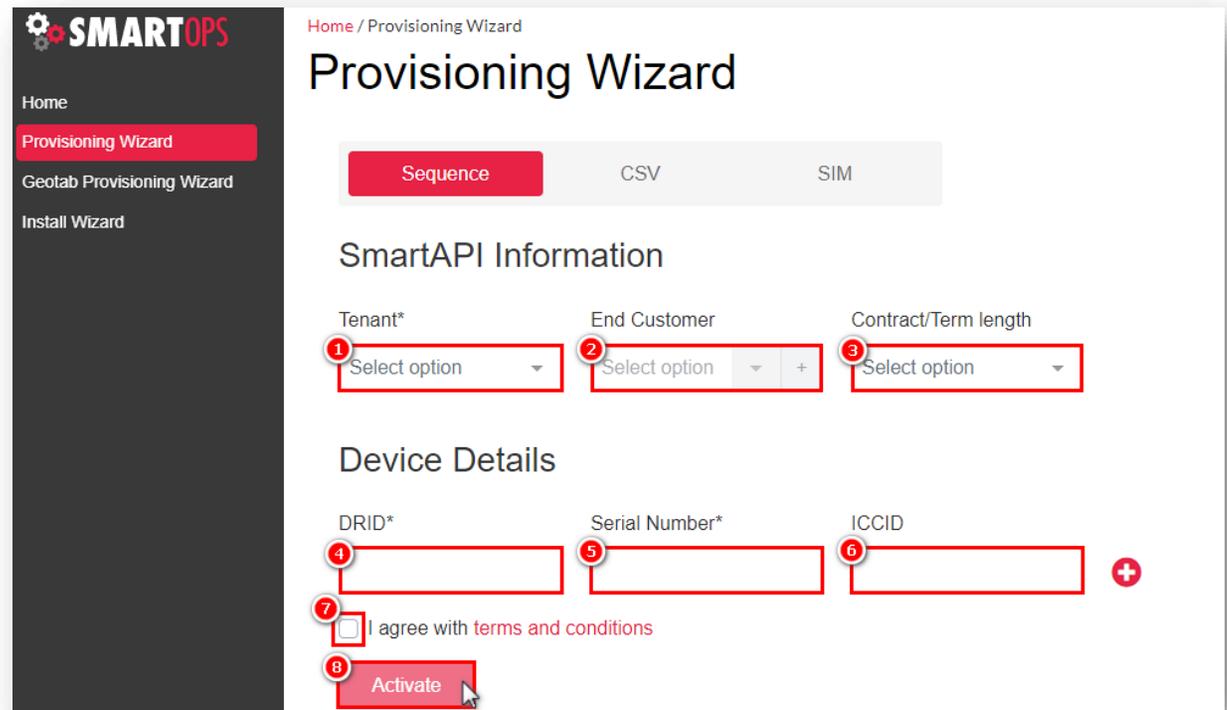

Read through the sections below to understand of the function and purpose of each method.

Sequence Method

The most convenient way to activate multiple devices for any INSIGHTS Tenant.

Follow the steps below to activate a device with this method:

1. Select the SmartAPI **Tenant** (TSP) to which you wish to assign the device.
2. Enter an **End Customer** (TSP Customer).
3. Choose your SmartAPI **Contract/Term length**.
4. Input the **DRID**.
5. Add your device **Serial Number**.
6. Input SIM details - **ICCID** of the pre-installed SIM or your own.
7. Check to agree to the platform's **Terms and Conditions**.
8. Click **Activate**.

The screenshot displays the 'Provisioning Wizard' interface. On the left is a dark sidebar with the 'SMARTOPS' logo and navigation links: 'Home', 'Provisioning Wizard' (highlighted in red), 'Geotab Provisioning Wizard', and 'Install Wizard'. The main content area is titled 'Home / Provisioning Wizard' and 'Provisioning Wizard'. It features three tabs: 'Sequence' (active, highlighted in red), 'CSV', and 'SIM'. Below the tabs is the 'SmartAPI Information' section with three dropdown menus: 'Tenant*' (1), 'End Customer' (2), and 'Contract/Term length' (3). The 'Device Details' section includes three input fields: 'DRID*' (4), 'Serial Number*' (5), and 'ICCID' (6). Below these is a checkbox (7) for 'I agree with terms and conditions' and an 'Activate' button (8) with a mouse cursor over it.

CSV Method

The most flexible way to activate multiple devices and their built-in SIM cards for your INSIGHTS Tenants. You may use your own SIM cards for any number of devices. See the automated shipment confirmation email below. Use the CSV file from your order to provision.

SVA03S-A-5B	2		

 **Important Note:** To forgo SIM activation, delete the ICCID column in your sales order CSV file. Open the CSV file in Notepad to retrieve unmanipulated device information or enact changes. Do not alter the file if you cannot open Excel without file numbers automatically defaulting to scientific notation. An error has occurred if SIM cards in the CSV file end with "00000." Contact [support](#) if you require assistance.

With the unchanged CSV file, log in to SmartOPS and access the CSV page in the Provisioning Wizard.

1. Select a SmartAPI **Tenant** to which you want to assign the CSV file of devices.
2. Enter an **End Customer**.
3. Choose your SmartAPI **Contract/Term length**. This does not apply to SIM CSV Import files.

SmartAPI Information

Tenant* End Customer Contract/Term length

1 Select option ▼ 2 Select option ▼ + 3 Select option ▼

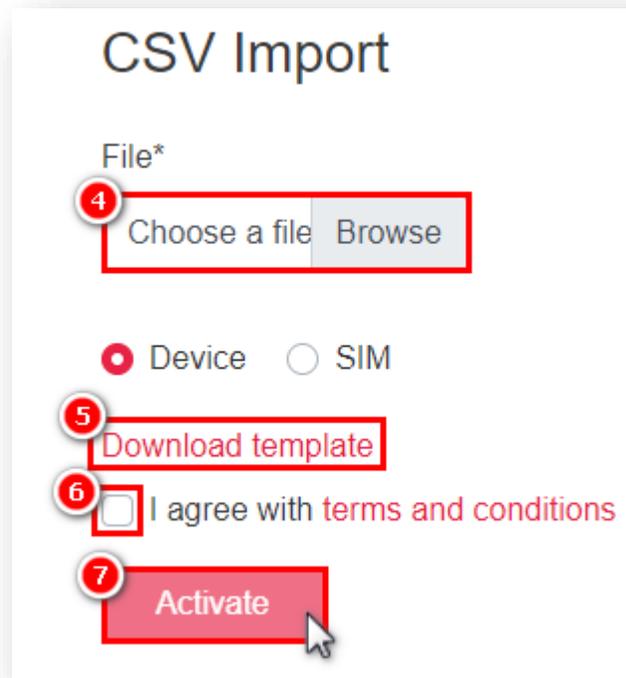

The image shows a screenshot of a web form titled "SmartAPI Information". It contains three dropdown menus. The first dropdown is labeled "Tenant*" and has a red circle with the number "1" next to it. The second dropdown is labeled "End Customer" and has a red circle with the number "2" next to it. The third dropdown is labeled "Contract/Term length" and has a red circle with the number "3" next to it. Each dropdown menu contains the text "Select option" and a downward arrow. The "End Customer" dropdown also includes a plus sign (+) to its right. Red boxes highlight each of the three dropdown menus.

Continue to the next page to complete the process.

4. Select a saved **CSV file**. Move on to step **#6**. If you have not already created a CSV file, skip step #4 and continue to **#5**.
5. Download the **CSV template**. Fill in the data in the template. We require Serial Number, DRID and ICCID columns for each row. Upload your updated CSV file.
6. Agree to the platform's **Terms and Conditions**.

 Important Note: Remember to distinguish whether the CSV import type is Device or SIM. You can fill in multiple devices per import file on separate rows, but the recommended limit for file import is 200 rows per file.

7. Click **Activate** to initialize the provisioning process.

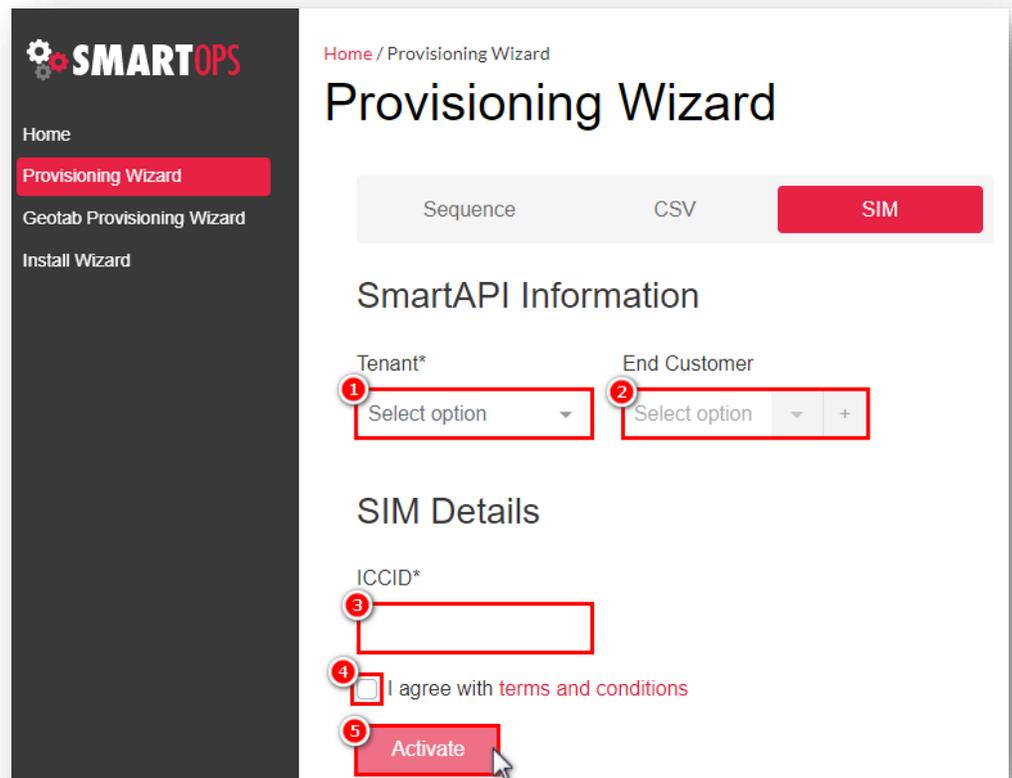

A screenshot of a web form titled "CSV Import". The form contains several elements: a "File*" label above a "Choose a file" button with a "Browse" button next to it; a radio button selection for "Device" (selected) and "SIM"; a "Download template" button; a checkbox labeled "I agree with terms and conditions"; and an "Activate" button. Red circles with numbers 4, 5, 6, and 7 are overlaid on the form, pointing to the file selection, download template, terms and conditions checkbox, and activate button respectively. A mouse cursor is pointing at the "Activate" button.

SIM Method

The quickest way to activate a single SIM for your INSIGHTS Tenant.

Activate a device with this method by working through the steps below:

1. Select a SmartAPI **Tenant**.
2. Enter an **End Customer**.
3. Input your device **ICCID**.
4. Accept the platform's **Terms and Conditions**.
5. Click **Activate**.

Summary

You will receive a summary email of your provisioning status once you complete the process. Below you can see a sample email of both a successful and a failed provisioning, each with the attached CSV list of device information. Failures occur when devices are already assigned or SN/DRID numbers do not match or exist.

You have finished your device provisioning. You should see each device listed under your Tenant in the SmartAPI Workstation.

Support

Should you need support, contact [INSIGHTS](#) or [email us](#). Read the following responsibilities of the support team regarding unit provisioning.

Support Provisions:

- All newly purchased FedEx and GroundCloud devices.
- All replacement devices from Advanced or Standard RMAs.
- All devices from Device Assignment Request forms submitted by clients or INSIGHTS sales personnel.

 Important Note: Notify Support of requests before installation and include device invoices to ensure units are provisioned before leaving the INSIGHTS warehouse at our Schaumburg location.
